MIDDINA KISHORE

PYTHON DEVELOPER

middinakishoreyadav2005@gmail.com | 6281449878 | Chirala,Andhra Pradesh

PROFILE SUMMARY

I am a dedicated Computer Science undergraduate with strong foundations in Python programming, full-stack development, and cloud fundamentals. I possess hands-on experience in Linux environments, networking concepts, shell scripting, and backend development using Flask and REST APIs. With practical exposure to AI-driven systems and scalable application design, I focus on building efficient, research-oriented, and real-world problem-solving solutions. I am eager to contribute to innovation-driven academic environments while continuously strengthening my technical depth and engineering rigor.

EDUCATION

NRI INSTITUTE OF TECHNOLOGY *2023-2027*

COMPUTER SCIENCE ENGINEERING WITH DATA SCIENCE SPECIALIZATON

SRI MEDHAVI JUNIOR COLLEGE *2021-2023*

MAIN STREAM OF MPC

SRI SRINIVASA ENGLISH MEDIUM HIGH SCHOOL *2021*

SSC SECONDARY BOARD OF EDUCATION,ANDHRA PRADESH

PROFESSIONAL SKILLS

- PYTHON
- GIT AND GITHUB
- FRONTEND WEB DEVELOPMENT
- AWS CLOUD BASICS
- DATA SCIENCE USING PYTHON
- LINUX AND SHELL SCRIPTIING

PROJECTS

- **Driver Fatigue Detection System**

Built a real-time driver fatigue detection system using Python, OpenCV, and MediaPipe FaceMesh for facial landmark tracking. Implemented an Eye Aspect Ratio (EAR)-based algorithm to accurately detect prolonged eye closure while reducing false positives. Designed a Tkinter-based desktop interface integrated with automated alert mechanisms. Deployed the application as a standalone executable to improve road safety through AI-driven monitoring.

- **AI Eye Disease Screening Platform**

Developed an AI-powered eye disease screening system using Python, FastAPI, and a Convolutional Neural Network (CNN) for retinal image classification. Engineered an optimized image preprocessing pipeline to enhance model accuracy and ensure reliable inference. Implemented a modular REST API backend enabling real-time prediction with confidence scoring.

- **AI-Powered Mock Interview & Career Advisory Platform**

Developed an AI-driven mock interview platform simulating coding, aptitude, and AI-based interview rounds. Designed an automated code evaluation engine with test-case validation and structured performance analysis. Implemented personalized resume-based question generation and detailed feedback mechanisms for skill assessment. Built a scalable backend architecture supporting real-time evaluation and performance tracking. Enhanced job readiness by integrating communication scoring and data-driven career improvement insights..

CERTIFICATIONS

- Data Science Professional Certificate – IBM
- Python for Data Science, AI & Development – IBM
- Crash Course on Python – Google
- Software Creation: Version Control, Debugging & Object Design – Coursera
- Git and GitHub – Google
- AWS Certified Cloud Practitioner – AWS Skill Builder
- Salesforce Certified Agentforce Specialist – Salesforce
